

Helping your Community Reduce Water Use **FREE Training**

Outline

Under the National Waste Prevention Programme (NWPP), the Local Authority Prevention network (LAPN) is offering free training on helping your community reduce water use. This will cover water use reduction measures for end users – schools, businesses, institutions and homes.

One or two people from your region are welcome to join this course. The course will be delivered by the Clean Technology Centre, CIT in conjunction with Lowflo Ltd.

What: Half-day training course on helping your community reduce water use

When & where:

- Tuesday **26th November 2013, Limerick**
- Wednesday **27th November 2013, Galway**
- Thursday **28th November 2013, Dublin**

Venues in each location to be confirmed shortly

Time: 10 am - 12.45 pm

Why attend?

Water has never been such a topical issue as it is at the moment - with water restrictions, forthcoming domestic billing and so on.

Local authorities have a significant involvement in their local community through work with schools, tidy towns, etc. In addition, helping businesses identify ways to reduce direct business costs through reduced water use is an important service to the business sector.

The course we are providing in your region will up-skill local authority staff to provide a service to local community groups, schools and other organisations, and businesses in the area through a free assessment to identify ways to reduce the cost of water.

Who should attend?

Staff of all local authorities are welcome. The course is primarily aimed at Environmental Awareness Officers, but may be of interest to other local authority staff.

Apply Now

Numbers are limited as the courses involve hands-on exercises.

Please respond to:
eileen.oleary@ctc-cork.ie

What will be covered?

- How to assess water use in a business
- Options for reducing water use in different applications
- Typical costs for retrofitting & typical savings
- Hands on demo at the training venue - assessing water use, likely options, their costs and savings
- Benchmarks for some sectors
- Case studies

**Funded by the National Waste
Prevention Programme**
